ITSO and Transport for London Support Smart Card Centre Research

The ISG Smart Card Centre (SCC) is very pleased to welcome ITSO, (a UK transport standardisations organisation) and Transport for London (TfL) as Associate Members. These two organisations represent the major driving forces in the UK for the use of smart card enabled travel systems and their support for the SCC is indicative of SCC/ISG expertise and experience in this area.

ITSO and TfL have both committed financial support to the SCC's contactless smart card research for a minimum period of three years. The work aims to give industry partners the opportunity to be forewarned and better informed of practical attack scenarios that may affect transport systems.
